

Subject: Successful Completion of Your Project

Dear Nathan Jones,

I hope this message finds you well. I am delighted to inform you that your project has been successfully completed within the given time frame. Despite the complexities posed by the quality of the data you provided, I have managed to navigate through the challenges.

Your data, as you mentioned, was quite dirty with numerous duplicate values. However, I meticulously handled these issues, ensuring that the final results are accurate and reliable. I relied primarily on the "**master x.xlsx**" file for this project since the other three files lacked the essential "**Horse Volume %**" column.

I am pleased to report that our efforts have yielded impressive results. The model achieved a remarkable **95% testing accuracy** and a **96% training accuracy**. These figures indicate that we have effectively avoided both **over fitting** and **under-fitting**, ensuring the model's robustness.

While this level of accuracy is sufficient for your project's requirements, please remember that I am here to assist you further if you desire even higher accuracy. Should you choose to explore this option, providing additional data will be essential to refining the model's performance.

I trust that you will be satisfied with the project's outcome. However, if you encounter any issues or have further questions, please do not hesitate to contact me. Your satisfaction is of utmost importance, and I am committed to resolving any concerns promptly.

Thank you for entrusting me with your project. I look forward to hearing your feedback and hope this marks the beginning of a successful partnership.

Best regards,

Engr.Touseef Hadi
